

READ THIS FIRST

We are all human and we make mistakes, this proof is our final line of defense against any errors we may have made. We want to make sure that you get the best custom product possible, so please take a close look at the image of your product on the right.

This proof shows you the general position & color of your artwork, as well as the background color of your flag. Color variations can exist from screen to actual printed product, especially for non-vector images (where we cannot guarantee the color). If you're not sure about a color, please call us and we would be happy to help.

A good rule of thumb when viewing a proof is not to assume anything. If it does not look correct, or if you are not sure, please call us at 1-800-958-3009. Thanks!

Colors

If supplied, PMS Colors will be matched as close as possible.

CMYK and RGB Colors will be printed "AS-IS". Without PMS Colors we cannot guarantee color accuracy. With CMYK or RGB colors, there is a chance that the print color *may vary greatly* from the screen color.

Due to the limitations of current technology we cannot guarantee an exact match to all pms colors. We will try to match them as close as possible.
